

Quentin K.

DevOps Engineer · AWS · IaC

qko.coffee · github.com/kquentin · linkedin.com/in/quentin-k

DevOps engineer with 5+ years of experience. Proficient in GNU/Linux, cloud infrastructure, and IaC. Strong systems engineering and DevOps practices. Committed to open source and privacy.

EXPERIENCE

DevOps Engineer — Unify Technologies Jan 2024 – present

Early-stage fintech SaaS. Built and maintain the full AWS infrastructure — Terraform, multi-region, security-first. SOC2 compliant. Full remote.

DevOps Engineer — Hackuity Jul 2022 – Feb 2023

Vulnerability management startup. Set up AWS infrastructure with Terraform and Ansible. Rewrote the deployment tooling, built a centralized certificate management system. Full remote.

DevOps Consultant — Apside Jun 2021 – Aug 2022

Refactored and containerized an in-house ERP with Kubernetes orchestration. Owned end-to-end delivery at high frequency — trunk-based development, feature flipping. Full remote.

DevOps Consultant — CGI Mar 2019 – May 2021

L1 to L3 incident handling at La Banque Postale, full autonomy under SLA. Built and maintained shared CI/CD pipelines and Jenkins libraries.

EDUCATION

Bachelor's in Computer Science — Université Haute-Alsace 2016 – 2019

Highest honors. Fully hands-on program — real partner company projects and internships throughout.

STACK

AWS · Terraform · Docker · Serverless · Python · Bash · Linux
